

*fourDviz*TM

- What is *fourDviz*TM?
 - Temporal Visualization Database Management System
 - Decision Support & Presentation Tool
- Real-time Simulation **NOT** Animation
 - Immediate Feedback for Visual Analysis through Interaction
- Time Control Functionality
 - Select and View desired Time Dependent Relationships

*fourDviz*TM Applications

- Environmental Impact Visualization
- Noise Impacts
- Land Use Planning
- Master Planning
 - Short and Long Term
- Construction Management
 - Project Phasing, Scheduling, Design Planning
- Transportation Planning
- Traffic Analysis
- Litigation and Conflict Resolution

Benefits of Using *fourDviz*TM

- Improve Communication
 - Company, Investors, Politicians, Concerned Public
 - Build Consensus between Project Stakeholders
- Saves Time & Money
 - Through Virtual Analysis prior to Build
- Examine Alternative Scenarios
- Evaluate Dynamic Activities
 - Traffic, Aircraft, Pedestrians within Simulation
- Can be used by both Technical and Non-Technical Users
- High Fidelity Visual Presentation Materials

Why *fourDviz*TM?

- *fourDviz*TM is a multipurpose technology.
 - Applicable Throughout All Phases of Project
- *fourDviz*TM is fully integratable.
 - Able to Interpret Any Temporal Dataset
 - Able to Import a Variety of External Visual Models
- *fourDviz*TM makes complex datasets visually understandable.
- *fourDviz*TM empowers its users.
- *fourDviz*TM is a cost-effective desktop solution

The *fourDviz*TM Goal

- Empower the Industry by providing affordable desktop computer access to the most versatile, interactive, real-time 4D visualization technology for cost-effective project applications.
